

# **COP2812 Extensible Markup Language (XML)**

## **Project 5 (Chapters 13-14)**

---

Using XML and XSL, write an XSL document that will format your XML into a PDF file. You must meet the following requirements:

1. Create or use an XML file to hold a series of menu elements, corresponding to the appetizers, main courses, beverages, and desserts. Each menu element should have a series of item names and prices.
2. Create an XSL file that will format the XML into a document showing the menu element, followed by a numbered list of items and prices within that heading.
3. You must name your files yourlastname\_Menu.xml and yourlastname\_Menu.xsl.
4. To turn in your project you must:
  - a. Attach your XML, PDF and XSL files to an email message.
  - b. Send the email to me by 4/28.
  - c. Print your XML and XSL files. Make sure your name is on the printed sheets.
  - d. Turn your hardcopy into me by the due date as indicated in the class syllabus. I will return the hardcopy the following week with your grade.
5. This project is extra credit worth a maximum of 3 points if received by the deadline
